A New Direction in Steel Siding

Not just siding—a powerful statement of beauty.

We’ve combined high tech steel and our ultra-durable proprietary SMP coating for the best siding experience. Our latest coating, a silicone polyester, has been enhanced to outperform other coatings for resistance to chalk, fade, corrosion and moisture. Navigator will stand up to damaging UV lights, weather and humidity but can be easily cleaned with just water.

Powerful Curb Appeal.

Keep homes looking new for decades with Navigator’s virtually maintenance-free panel that never needs re-painting. Navigator’s low gloss seamless coil and boxed siding is available in 16 on-trend colors to work beautifully on any home type.

See pages 24-26 for more information.
A Perfect Combination of Ventilation and Design

Now you can experience the ideal marriage of form and function in a discretely vented soffit that retains its beauty for decades. The Stealth Soffit system from Rollex employs an intelligent design to produce a smooth surface, free of visible venting. Beneath its handsome exterior, its dynamic hidden ventilation solution promotes continuous airflow to keep attics cool and dry.

- Unsightly vents are hidden from view
- Prevents premature aging of roof systems
- Provides optimum air-flow
- Saves time—never needs painting
- Guaranteed not to crack, fade or peel
- Long lasting quality maintains beauty for decades
- Environmentally responsible

Aluminum Trim Coil

Wrap Your Projects Beautifully

Formulated to meet the demands of field forming, Color Select aluminum trim coil installs crisp and flat. It’s rugged yet flexible finish protects against cracking, chipping and flaking while offering exceptional scratch resistance. With Color Select, your projects are protected from the harshest elements for a lifetime of virtually maintenance free beauty.

• Offered in wide range of colors to match popular siding manufacturers like Certainteed, Royal, Crane, James Hardie, Stylecrest and More!

ARRAY OF COLORS

Enjoy the endless design possibilities with our extensive color selection. Our perfectly matched color system between soffit, accessories, rainware and siding is suitable for all home types.

Our exceptional painting system ensures consistency of color, so you know the color you order is exactly what you'll get. Plus, no matter which rich shade is chosen, our products stay true and looking new, with virtually no maintenance.

Depend on Rollex for superior craftsmanship, quality construction and exceptional beauty. Guaranteed with a Lifetime, Limited “No-Nonsense” Warranty
## COLORS

Beautiful designer colors that will last for years to come.

16" and 12" Soffit System Calculation Charts

To determine the number of soffit panels required for your project, follow these 3 simple steps:

1. Measure the width/depth of the soffit(s) from wall to outside of fascia board.
2. Measure the running length(s) of the overhang.
3. Use one of the charts below to find the number of soffit panels needed.

Soffit is a Critical Component to Proper Attic Ventilations

A properly vented attic will help to:
1. Prevent costly and damaging heat buildup in the summer
2. Prolong roofing materials life
3. Improve the comfort level inside the house, keeping air conditioning costs to a minimum
4. Ensure your shingle warranty remains valid
5. Prevent mold, mildew, rot and poor indoor air quality
6. Fight the formation of ice dams and prevents damage to personal items stored in the attic

How do I ventilate the attic?
The most important thing to keep in mind when ventilating your attic is maintaining the proper intake and exhaust ventilation balance.

You need both intake and exhaust ventilation installed at an approximate 1:1 ratio. Check to see that there is a balance between exhaust vents and intake vents. Pay careful attention to the number and location of the intake vents. Most roofing professionals agree that the best type of ventilation is continuous soffit and ridge ventilation.

What is net free air?
The net free vent area is the portion of the opening of the vent that actually ventilates. Rollex soffit products are the perfect solution for your intake ventilation needs.

Doing the math
According to the FHA (Federal Housing Administration- US) for every 300 square feet of attic floor you have you should have, at minimum one square foot of ventilation. Generally speaking, 1/300 ventilation is required if a vapor retarder is being used or the system is balanced – one-half the vents high on the roof for exhaust and one-half the vents low in the soffit area for intake.

To meet 1/300 code requirements:

Attic square footage divided by 4 = amount of intake Net Free Area (in2) and the amount of exhaust Net Free Area (in2) needed. For example: 1200 square feet divided by 4 = 300 in2 NFA intake and 300 in2 NFA exhaust.

Please refer to your local building codes or the 2000 International Building Code to ensure you are in compliance.

Frequently Asked Questions

1. How far can you span System 3 soffit?
   a. We recommend the use of an intermediate support nailer 15° on center for spans greater than 24”

2. What can be put over treated lumber so trim coil can be used?
   a. We recommend the use of a non-perforated, non woven weatherization system that provides an air and water resistant barrier.

3. How do you cut Steel siding?
   a. Steel siding can be cut using either a guillotine or a circular saw with a ferrous blade. We recommend Tenyru blades (PRF-18548 BWK 7 1/4” 48 tooth and PRF 18556CB 7 1/4” 56 tooth)

4. Do you need to use aluminum nails to install aluminum siding?
   a. Yes. Nails should be driven straight and level, never slanted up or down so as to possibly cause distortion of the panel. Use 2 inch nails (or longer) for non-insulated siding, as well as most trim accessories.

5. Can you put trim coil up against copper?
   a. No. We do not recommend using trim coil in direct contact with dissimilar materials such as copper, zinc or steel as well as treated lumber, concrete, stucco or other corrosive non-metallic material. Claims resulting from contact with dissimilar materials are not covered under the warranty.

6. What is the recycled content of your aluminum and steel?
   The aluminum we use has approximately 80% post consumer and 20% pre consumer recycled content, although this can vary depending on the availability of scrap at any given time.
   The steel we normally use has 25% recycled content but can range between 20 and 30%.

7. Where does Rollex purchase its metal?
   Generally at Rollex we strive to source materials from within 500 miles of our Elk Grove Village facility to reduce emissions and save energy.

8. How many facilities does Rollex have?
   Rollex has one facility located approximately 15 minutes from O’Hare airport in Elk Grove Village, IL.

9. Does Rollex paint its own product?
   Yes. Our onsite paint line allows for precise color matching and quality control to ensure each coil is painted to our specifications. Rollex is one of the few building product manufacturers with an in-house paint line system.

10. Are your products LEED certified?
    Although our products are not currently LEED certified many currently hold green certification from the NAHB Research Center.
    To view product certificates please visit www.rollex.com/products/green-certified-products.
Soffit is a Critical Component to Proper Attic Ventilations

Aluminum Siding, Soffit and Fascia

- Siding, soffit and fascia are made of 3105 or equivalent aluminum alloy. Soffit is H28 or equivalent hardness, siding and fascia H26 or equivalent.
  Thickness: 0.019” nominal
  0.024” nominal

- Meets performance requirements of AAMA 1402-86.
- Coating Characteristics
  1. Gloss: 8 to 12 on 60° Photovolt Meter, ASTM test D523.
  4. Adhesion: 8 to 12 on 60° Photovolt Meter, ASTM test D523.
  5. Humidity Resistance: No loss of gloss, cracking or peeling after 3,000 hrs. in 100% relative humidity, ASTM test D714 and method 6201 of FTMS 141a.
  7. Impact Resistance: No visual cracking or Scotch tape pick-off when subject to impact in inch pounds equal to 1,500 times metal thickness. NCCA test 11-6.
  8. Exterior Exposure: Fade: Shall not exceed more than 5 Color Difference Units within 5 years after removal external deposits. ASTM test D2244.
  9. Dry Film Thickness: .70-1.00 Mils.

Steel Siding and Accessories

- Siding is made from roll formed 0.0172 inch (nominal) thick hot dipped galvanized steel complying with ASTM A653 and having minimum yield and ultimate strength of 33,000 and 55,000 psi respectively.
- Coating Characteristics: Dry film thickness limits: 4 mils nominal Gloss range: 10° to 15° on 60° photovolt meter.
- Withstands Category 5 Hurricane winds over 155 mph*

1. Adhesion of Film:
   (a). No blistering or loss of adhesion after immersion in distilled boiling water for a minimum of 4 hours followed by a minimum 4 hour freeze test. (b). Rollex PVC finish shall not be removed from cross hatched lines scored 1/8” apart after application of No. 600 Scotch tape.

2. Flexibility:
   (a). Mechanical tests at 77° F showed no fracture of the coating at 10X magnification or any loss of adhesion when tested with No. 600 Scotch tape. (b). Reverse Impact: Garner impact Tester- 5/8” Steel Ball, 120 inch lbs., 29 gauge steel. (c). Bending: OT 180° bend, 29 gauge steel. (d). Draw: Tinius Olsen Test-1” steel ball, 0.3 inch uniform draw.

3. Elongation:
   Shall withstand a minimum elongation of 120%.

4. Tensile Strength:
   Rollex finish shall have a minimum of 2,200 lbs./square inch of cross sectional area when tested according to ASTM D882-56T.

5. Abrasive Resistance:
   Standard Tabor Abraser Test at 77° F, when using a CS No. 10 wheel with 500 GM load, film loss shall be 1.0 mil per 2,500 cycles, maximum. Typical 4 mil Rollex PVC finish shall withstand 10,000 cycles minimum.

6. Accelerate Tests:
   Humidity Cabinet: Rollex PVC finish panels given a 90° bend and subjected to 100% Relative Humidity at 100°F (+/- 5°F) for 1,000 hours showed no blistering, cracking, loss of gloss or peeling and no softening after 24 hour recovery.

7. Salt Spray:
   Rollex PVC finish, when subjected to a 5% salt solution (ASTM B117), shall withstand 1,000 hours exposure without blistering or loss of adhesion.

8. Weatherometer:
   Rollex PVC tested in accordance with ASTM D822-57T after a period of 2,000 actual light hours with humidity control shall show no cracking, crazing or loss of adhesion. The maximum allowable chalk and color change shall be:
   (a). Chalking: No greater than ASTM D659-44 No. 8 rating, based on a scale of 10 being excellent. (b). Color Change: No greater than 5 N.B.S. Units after removal of external deposits.

9. Chemical Resistance:
   Rollex PVC finish will withstand total or partial immersion in most acids at concentrations up to 40% and all alkali and salt solutions.

*Wind speed rating will vary depending on specific regional construction methods and codes. Please refer to local building codes for detailed requirements concerning allowable wind loads and specific conversion tables for actual wind speed.
Aluminum Building Products Warranty

Lifetime Warranty; A Limited and Transferable Warranty

Coverage
Rollex Corporation ("Rollex") warrants to the original homeowner that Rollex aluminum building products are free from manufacturing defects and when used as intended under conditions of ordinary wear will not peel, chip, crack, split, flake or blister. Rollex warrants for a period of twenty five years from date of installation, that color change in panels used as intended will not vary more than seven color difference units and that chalk erosion for colors will not exceed a numerical rating of six units over the same period of time.* This warranty does not cover non-uniform color changes resulting from unequal exposure to sunlight.

If a product fails to perform in accordance with the above standards, after written notification and validation of the condition by inspection, Rollex Corporation will repair or replace, at its option, any defective product, assuming 100% of the cost. In the event of repair or replacement under the terms of this warranty, the original warranty terms and duration will remain in effect for the remaining warranty term.

All warranty claims shall be settled between the owner and Rollex. Rollex may direct and pay a contractor to perform any remedial work under this warranty. If any corrective work on or replacement of warranted products is performed by the homeowner or anyone engaged by homeowner prior to receiving written permission to do so from Rollex, such action will void the homeowner’s coverage under this warranty.

The liability of Rollex for a claim under this warranty shall in no event exceed the homeowner’s original purchase price- including labor and taxes- for the product involved. It shall be the homeowner’s obligation to provide documentation or other reasonable evidence of such original costs.

Duration
1. Original Owner: This warranty is in effect for the lifetime of the original homeowner so long as such original homeowner continues to own the home where Rollex products have been installed.

2. Second Owner: This warranty can be transferred by the original owner to whom is issued to the next owner of the property. Upon completion of the transfer, the warranty period shall be limited to 50 years from the original date of installation of the Rollex products; provided, however, Rollex and the second owner shall share the cost of repair or replacement of any defective products, including labor and materials. (Please see “Allocation of Warranty Costs When Applicable”)

3. Institutional Owner: For an owner such as a corporation, partnership, group, governmental agency, association, or other organization capable of enduring for generations, this warranty is limited to a period of 50 years from the date of original installation of Rollex products.

Warranty Registration
This warranty is valid only after the registration card has been completed by the Rollex building products dealer, signed by the original owner and mailed to Rollex within 30 days after installation has been completed. Failure to register within the 30 day period set forth above will not void the warranty, but registration will confirm the date of purchase and will assist Rollex in processing any warranty claim that might arise in the future. This confirmation is a benefit to the homeowner in case original proof of purchase cannot be found.

Exclusions and Limitations
This warranty does not cover damage resulting from any of the following: faulty installation (including but not limited to waving and/or buckling caused by improper installation); “oil canning” (perceived waviness in the flat areas of metal siding panels); fire, lightning, hurricane, hail storm, wind storm, earthquake or other acts of God; accidental damage or vandalism; impact of foreign objects; structural shrinkage or distortion; lap abrasion; harmful chemicals, pesticides, fumes or vapors; direct contact with and water run-off from dissimilar metals or other materials (e.g., metals such as copper, zinc and steel, or other materials such as concrete, blacktop, stucco, asbestos siding, pressure treated or pre-treated lumber, roofing materials or roofing systems containing metallic granules or strips, or other corrosive non-metallic materials); damage resulting from painting, varnishing, coating or otherwise altering the surface of the products except in strict accordance with Rollex’s instructions or guidelines; distortion or warping caused by excessive heat sources such as window reflection, skylights, outdoor grills and other items which can cause products to distort or change color due to excessive heat buildup; surface deterioration due to air pollution and airborne stains; misuse or abuse; normal weathering; acid rain; salt spray directly applied or in the atmosphere; mildew accumulation; owner’s failure to provide normal cleaning and maintenance of the product (please see care and maintenance instructions); and/or other causes beyond the control of Rollex.
This is the homeowner’s exclusive warranty and is in lieu of all other warranties, express or implied, except as may be required by applicable law. Without limiting the generality of the foregoing, Rollex shall not be liable for any breach of any other written or oral warranties given to the homeowner by any third party(ies) such as those (if any) given to the homeowner by dealers, contractors, applicators or distributors of the products.

ROLLEX IS NOT LIABLE FOR INCIDENTAL, SPECIAL OR CONSEQUENTIAL DAMAGES FOR THE PRODUCTS COVERED BY THIS WARRANTY. REPAIR OR REPLACEMENT IS THE EXCLUSIVE REMEDY AVAILABLE UNDER THIS WARRANTY.

Rollex reserves the right to discontinue or make changes in any of its products. If the products covered by this warranty are not available, Rollex has the right to substitute a product of equal or greater quality or value.

Rollex does not hereby undertake to repair or replace non-defective Rollex products. Rather, Rollex may elect to repair or replace only the particular portion(s) of such Rollex products that is/are defective and/or excessively faded (as per the terms of this warranty) and we cannot and do not guarantee an exact color match with regard to the replacement product(s) as compared to the adjacent non-replaced products. Color variance may occur between replacement products in comparison with the original products due to normal weathering and aging of the original products, and this is not indicative of a defect in either the replacement products or the original products.

This warranty gives you specific legal rights; you may also have other rights which may vary from state to state. Pertinent state law shall also control for what period of time following the sale a homeowner/consumer may seek a remedy under the implied warranty of merchantability or fitness for a particular purpose. Some states do not allow the exclusion or limitation of incidental or consequential damages so the above limitation or exclusion may not apply to you.

Claims Procedure
A claim under this warranty must be presented in writing within 30 days following the discovery of any warranted defects to Rollex Corporation, 800 Chase Avenue, Elk Grove Village, Illinois 60007 Attention: Warranty Service Department.

The claim should be accompanied by a copy of this warranty certificate, and a description of the defect.

Corrective work on warranted products may not be started prior to receiving permission to do so from Rollex.

Ultimate determination of the existence and extent of any claimed manufacturing defect hereunder shall be made by Rollex in its sole discretion. As noted above, corrective work on warranted products may not be started prior to receiving permission to do so from Rollex, and Rollex reserves the right to perform such corrective work itself or through others retained by it. Homeowner shall cooperate with Rollex and its contractors in connection with the scheduling and performance of any corrective or replacement work hereunder.

In the case of second and institutional owners, after five years of the warranty period have elapsed, a claim under this warranty must be accompanied by a $50 payment to Rollex. Checks should be made payable to Rollex Corporation and mailed to the above address.

Warranty Transfer
This warranty may be transferred from the original owner to whom it was issued to the next owner of the property provided Rollex receives written notice within 30 days of the date of the transfer. Notice must include the original owner’s name as shown on the warranty certificate, the name of the new owner, the warranty certificate registration number and the date Rollex products were installed on the property.

Upon transfer of the property, the warranty period shall be limited to 50 years from the date of installation. Rollex and the new owner shall share in the cost of repair or replacement of any defective product, including labor and materials as described below.

Allocation of Warranty Cost When Applicable
For second and institutional owners the cost, including labor and materials, to repair or replace defective products shall be allocated between the owner and Rollex according to the following schedule: Rollex will assume 100% of such costs for validated claims made during the first five years of the warranty period. During the sixth year, Rollex’s share of such costs will be 90%, and the homeowner’s share will be 10%. Each year thereafter, through the thirteenth year, Rollex’s share of such costs will cumulatively decrease from 90% by 10% per year. Starting with the fourteenth year of the warranty period, and for the balance of the warranty period, Rollex’s share will be 10% and the owner’s share will be 90% of such costs.

Effective only for Rollex products purchased in or after January 2009.
Depend on Rollex for superior craftsmanship, quality construction and exceptional beauty. All of this guaranteed with a lifetime, limited no-nonsense warranty. A home is most likely a family’s single greatest investment, and for more than 60 years Rollex has been manufacturing innovative building products to help homeowners protect their most valuable asset.
