MATERIAL SPECIFICATIONS

TUFF KOTE Trim Coil shall be made of a ROLLEX 3105-type aluminum sheet with a minimum tensile strength of 29,000 psi, or equivalent, as referenced in AAMA specification 1482-86 (paragraph 3.2.3). The metal shall be treated on both sides with a chemical conversion coating to ensure excellent paint adhesion and resistance to corrosion. One side features a brushed texture and the other smooth coated with a high performance, roll-applied, mar-resistant, low-gloss polyester. The top surface is available in 12 colors and the reverse side is coated with Snowmist (490). All coatings conform to the standard commercial coatings specifications, as referenced in AAMA specification 1482-86 (paragraph 3.2.4).

TUFF KOTE Trim Coil is packaged with one roll per carton.
All 24" coils shall be packaged with 32 rolls per skid.

Coil shall be of the following width, length and thickness:

Product:	Width:	Length/Roll:	Nominal Thickness:
F-24TUF	24"	50 feet	.019"

APPLICATION

TUFF KOTE Aluminum Trim Coil is designed for residential and light commercial applications. Trim coil can be field-formed to provide low-maintenance coverings for exterior trim surfaces such as window and door casings, window sills, drip caps, fascias, porch posts, louvers, flashings, etc. Trim sheet shall be attached with color-matched stainless steel or aluminum painted trim nails.

Colors shown are approximate. Colors may look different on a house compared to print.
Please visit your local Rollex distributor or lumberyard to see colors in person.
