

# Caring For Your Rollex Products

Congratulations on choosing Rollex. Our metal products are finished with a premium baked-on coating designed to stay beautiful for years. To keep your home looking its best, follow these simple care steps.

## 1. Annual Refresh

A quick rinse once a year is usually all it takes. Use a standard hose or pressure sprayer to wash away dust and debris.

## 2. Tackling Dirt and Mildew

If you notice heavier dirt or mildew, try these proven methods:

- **For small spots:** Use a quick spray of Windex® or Fantastik®.
- **For larger areas:** Use a gentle mix of **30% vinegar and 70% water**.
- **For deep cleaning:** Mix 1/3 cup powdered detergent, 2/3 cup TSP, and 1 quart bleach into 3 quarts of water. (Remember to wear gloves!)

## 3. Pro Tips for a Streak-Free Finish

- **Work Bottom-to-Top:** This is the secret to avoiding streaks.
- **Texture:** Use a stiff brush for embossed metal to get into the grain.
- **Safe Spot-Cleaning:** Use **mineral spirits** to dissolve grease, tar, or caulk—but avoid abrasive scrubbers that could scratch the finish. Always rinse with water immediately after.

## Vinyl Siding Care

Rollex vinyl siding is designed for low-maintenance living. Just a simple wash with mild soapy water is all you need to maintain its curb appeal.
